

Jordan Pierson

Full-Stack Web Developer

713-677-1787 | jordanpierson1245@gmail.com | Houston, TX | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

TECHNICAL SKILLS

- **Languages:** JavaScript (ES6+), Python, SQL, HTML5, CSS3, Shell, Perl
 - **Frameworks and Libraries:** React, Express.js, Flask, Node.js, SQLAlchemy
 - **Databases & Tools:** PostgreSQL, SQLite, Git, GitHub, Visual Studio Code, Postman, Docker
 - **Technologies & Methodologies:** Full-Stack Development, Agile/Scrum, CI/CD, Responsive Web Design, Version Control, Database Design, API Integration, Cloud Deployment (Render)
-

PROJECTS

Rental Property Management System | React, Express.js, PostgreSQL [Live](#) | [GitHub Repo](#)

- Developed a platform enabling users to list property rentals, manage bookings, and track payments, designed to support 500+ concurrent connections with performance testing to validate load capacity.
- Engineered PostgreSQL queries with indexing and connection pooling to maintain <100ms response times across 5,000+ records.
- Designed responsive user interface with React and deployed on Render with automated CI/CD pipeline, achieving 99.9% uptime and sub-5-minute deployments.

Business Discovery & Review Platform | React, Flask, SQLAlchemy, SQLite, Docker [Live](#) | [GitHub Repo](#)

- Developed frontend and backend for a business discovery platform handling 5,000+ business listings and 10,000+ user reviews with location-based search, filtering, and real time updates.
- Architected RESTful API with 12+ endpoints for CRUD operations on reviews and business data.
- Deployed on Render using Docker containers and CI/CD pipelines, achieving 99.9% uptime.

PROFESSIONAL EXPERIENCE

Data Operations Specialist | Pierson Investments Jul 2018 – Present

- Managed database of 150+ residential properties, maintaining 99% data accuracy through quality controls and validation processes for purchase details, rental rates, and lease terms.
 - Generated comprehensive performance reports using SQL and Excel showing rental activity, occupancy, and property performance.
 - Analyzed acquisition data for 50+ potential properties to support purchase decisions and managed project timelines for acquisition workflows.
-

EDUCATION

Full-Stack Web App Developer

Bachelor of Business Administration | Management

App Academy – 2025

California Coast University – 2024
